Acknowledgment

Providing life to words is never lenient and it applied to me also. Several people have partaken towards this accomplishment and I'd like to cordially thank them.

First of all, I want to thank Almighty for making me capable of thinking about publishing my efforts. There was a time when I used to dream about when will the day come when I'll be holding a book of my own words.

I am not that much good in the English grammar but still I wrote this book. That's what mean for me.

My sincere Gratitude to my family members especially my brother Vishal Trivedi who were there in my toughest times and had always been encouraging me.

And yes without any doubt I would like to represent my sincere gratitude to the readers for choosing this book. And I've got such people in plenties, some of them to whom I'd like to thanks Tej, Govardhan Subudhi who helped me for framing the sentences. Special thanks to Phuthau L Phom who helped me so much for grammatical corrections and how to make proper sentence for

explanation. And every single soul who has helped me through out the journey.

And I would like to express my profound gratitude to the pacesetter of this book " Reetika Singh" for her incalculable assistance and guidance throughout this entire process.

Life

“Life is too short, you never know what tomorrow will bring”

Life is too short for spreading love and kindness. Life is very short to hold grudges against people we love. We never know what tomorrow may bring and so it's better to live this life in the best way. It's better to live in the present and be happy with what you have.

“Extreme liking or extreme disliking creates all the problem”

Likes and dislikes all indirectly connected with expectations. When someone fulfill your expectations then you will extremely like that person and at the same time for some reason if they don't satisfy your expectations then slowly you will start disliking them . This becomes more complex and it is the reason for all the problems.

“Life is so beautiful. When you start living life then you will understand the true meaning of it”

No doubt life is very beautiful. Sometime we don't live life because everything is going bad or we cannot find a single hope for it but every time we should give respect to life. The thing which we have to remember is why do we get the chance to live the life?. Life is actually too short for understanding the things.

“Whatever happens, Happens for the test.”

Every time we all are surrounded by our problems. Difficult days pass when we understand the reason behind it.

Sometimes the problems that you never even imagined will come and break your confidence very badly. On the other side whatever wrong is happening is because God knows how to make you stronger and how you deal with problems. It's your test to stay strong in the negative situations. So stay strong and be positive because this too shall pass. Hope for the best .

“Capture every moment of life because it will never come back again”

In today's era everybody is connected with digital web except some people. As we know this is a very common thing. Through social media we express our feelings. We capture every good and bad things because we know it will never come back again and one day this becomes memories.

“Never regret anything in life”

As we know whatever happens, It happens for the best. So why do we need to regret something? It might take time to understand this thing but never regret anything, it will give you nothing in return.

Always remember the power of your strength is more important than regret.

“Sometimes the worst thing in the world is that you can see everything but you can’t do anything for it”

I think most of us are well aware and mature enough to understand things. Some government Employees behave so rudely because they think they are superior to others and hold the highest position. And that moment they don’t care about others problems but one day same thing will happened to them. Then they will realize how it feels. These situations we all can see but we can’t do anything for it. We had become just a mere spectator.

“Angry people never live a normal life”

People’s weakness is their anger. Anger is a type or things which is beyond any harmful disease. Actually they are not wrong in it, their situations make them angry because they can’t handle this ridiculous world. No one can understand their feelings. Sometimes anger is very dangerous. There is no medicine for anger .

“Each person creates their own destiny”

You are the master of your Destiny. Life is like a keyboard because if you press the right keys, you have typed a good destiny. Every person has their own dreams, own circumstances. When your circumstances may determine the colors that you make on a everyday basis. So choose your own destiny and be yourself !

“Life is like a gift . Everyday we get new surprises”

When we get up early in the morning we don't know what will happen in the entire day. Life is a beautiful gift we had ever received. Whole day we get new things.

Yes, sometimes it can be good or bad also but the most important thing is we get. So accept this gifts and grow up in your journey.

“Whole life we keep on trying to make ourselves better and better”

Yes , No doubt we live because of our dreams, our purpose, our family, because we know the value of it. Everytime we are just thinking of how can we do better?

Whole life we keep on trying and trying but when we grow we gradually become better. No need to always keep on trying. Don't try to forget your inner peace.

“If we have to change our life, we should get out of our comfort zone”

This is the real time to work and improve your future plans. Your career depends upon what you are doing today because after 5 to 10 years you will realize the importance of this time. After that there is a no time to regret. We will never succeed under our comfort zone. Yeah! Do whatever you want to do but if you really want to change something in your life then get out of your comfort zone.

“It’s never too late to say anything”

Sometimes we miss a chance to say something but it’s never ever too late to say anything. Follow your heart. Tell whatever you want to tell but make sure you are right. Your thinking and what you want to talk should make sense. So think before you speak.

“Life is nothing without risk”

One thought related to this is “Risking is better than regretting”. I think life is ultimately about taking risks. When you want to try something Some people will try to destroy you. But if you want to do it then take the risk. No matter what people think. Your thinking matters, not others opinions.

You might fail but you will learn so many things and yes, taking risk is not so easy .

“We have to educate ourselves”

“Educationists should built the capacities of the spirit of inquiry, creativity, entrepreneurial and moral leadership among students and become their role models.” As Stated by Dr. APJ Abdul Kalaam “Educate yourself for better version of yourself”.

We should educate ourselves not for so called marks but for better understanding. We need to acquire a quality education. Education is the only thing that helps you in every field of knowledge.

“Everything has a limit”

We all want to become limitless in some field.

Some of us cross all the limits of the desires but we have to learn this thing that everything has a limit never cross your limit even in words as well.

***“Forgive those people who always
disappoint you”***

In sanskrit the word for forgiveness is “क्षमा वीरस्य भूषणम्”. See there is a no such people that is bad or nobody intentionally wants to disappoint you. There is a always some reason for it. So not all time but try to forgive people.

“The world is like a rainbow”

World is really very beautiful. Take a moment to capture the beauty of Nature, sky, birds, animals and human’s creation etc. everything is looking wonderful. All things are colorful and peaceful. Just the thing is we have to observe it. It’s all is God’s wonders but now a days it is starting to disappear. So please take care of nature’s beauty.

“Life is a competition”

Everybody wants to become first in every field. Life is all about the next step. The step we take might be difficult but if you keep on trying you will definitely win.

Competition means you should be greater than someone. Competition is everywhere like see our education system, singing, dancing or many more. On social media also you could find competition but I think it is necessary.

“Green color is the beauty of nature”

I wrote this quote because our environment is looking so peaceful because of trees, forest. Trees are someone's hope like animals, farmers and it's a source of oxygen as well. Now somewhere green color is not seen in environment. We human being had damaged it. Please try to protect our greenery. When you feel it, it is a peace.

“Universe within ourselves”

This is something like affirmation. We should call ourselves that universe within you. It will help you to encourage you. We can clearly find our way. We never imagine how powerful we are. We can do anything. We all are the best.

“Life is a bundle of untold dreams”

Dreams are those which you can see and also show it to others. However some dreams cannot be shown to others but are very important to us. Life is all about completing our purpose or dreams. Anyone can see dreams but only those people succeed who actually work for it.

Hope

“Another name to fulfill hope it’s called life”

Hope means something we wish or dream about. Life is all about completing our hopes . Everyone should have hope because hope will help us reach our destination. We all are indirectly connected with hope.

Hope for life, hope for better future. So In short another name to fulfill hope is called life.

“Relationship is a source of hope”

I think every new relationship starts with hope. Hope for better understanding, trust,love, faith, care, etc. Hope is the only thing which you cannot define .
So hope is everything.

“Hope is the key to your dreams”

Desire to choose your path. Wish to complete it. Dreams is like a lock and hope is like a key to your dreams. It’s all related to a game which we had played in childhood. As simple as that Lock is incomplete without key and key is incomplete without lock.

“Today’s hope is tomorrow’s happiness”

Yeah, Life depends upon what you are doing today.

We always think about present, past and future. Most of us think only about the past and indirectly past comes in front of them. Some people think about the future but rarely people think about what they do in present. Hope is that power which will carry you till the end if you believe in it . So present hope and desire is future’s happiness.

“All the great things start with hope”

When we start dreaming something it starts with hope because we don’t know in that mission we will succeed or not but hope for it. The great things always take time and it seem difficult but it all starts with hope. If we can see our future on that particular things then we can focus more.

“Hope has played an important role in our lives”

As we see our past we have achieved something in life like good percentage in exams, good memories, etc. It starts with hope. Life is incomplete without hope. Sometimes some of our dreams may not

come true at that very moments we regret it but only hope will help you to get closer to your dreams. No doubt hope has always played an important role in our lives.

“Those who believe in god will definitely succeed one day”

God is someone whom you can trust the most. God is always with you if you are right. There are always some situations when you do not believe in god's power but sometimes god want to test your capacity and ability to solve the problems. God always keeps on trying to make you more and more strong each day.

“Every morning we wake up with new hope, new dreams and new beliefs”

Everyday start with a new hope. Our beliefs make us strongest . Dream to achieve something better in life. It Start from the Morning when we wake up and end to the sleeping at night most of our activities depends upon hope. Hope is something which you cannot imagine how powerful it is.

“Hope is like a candle. When we burn it, it will spread the light”

Like a candle when we see Hope it makes us positive in life. When we burn a candle it will spread its light and ward off darkness.

After every dark night there is a bright morning. So the basic thing is when you hope for something in a good way ,you will work on that and you will succeed. May not be immediately but definitely.

“Make sure your hope creates you not destroy you”

Sometime hope is not in our favor. Creating of something in good way it will always create you but when you hope for something bad you will not go long and after sometime it will destroy you. Hope is always in one way . Hope is something that you are just hoping and not doing anything for it.

“Hope is seeing good in spite of being surrounded by badness”

When everything is going wrong or bad only our hope will help us to get out of this worst . Good things take time. Now a days a common example of hope is the corona virus vaccine. Few months ago we could only hope for the vaccine and now after few months in some place it is fulfilled. So when things are not in your hand just hope for it.

“Most of our thoughts are related with hope”

Journey of million miles starts with a single hope. Hope has an ability for the better future. Actually every new thing starts with hope. If we cannot hope for it we will not go so far. It might go but no longer because if you can't see how far you want to go you will not complete any how.

Happiness

“Spread goodness, spread happiness”

I strongly believe in this quote. In today's era somewhere goodness is not seen. It's destroyed. We have to make it happen again. Always be humble and kind. When you are seeing badness or something wrong, if you can't see that badness then you are an excellent person. Spreading goodness and happiness is not easy but if you try it is not that tough.

“Always remember one thing every difficult time we lost our sixty seconds of happiness”

As we know happiness is not something ready made. When problems increase our happiness decreases. It's not about just sixty seconds but it is for entire life. Because if you can create happiness in that moment of time you cannot do anything in life. Difficult times come for our test. So nothing is more important than our smiles. Keep smiling always!

“Smile to change your life”

Most of the time we smile because we achieve something or something good happen to us or we meet someone good etc. But all these things is temporary happiness but when you enjoy every moment of time then it's your permanent happiness. You should know the difference between temporary happiness and permanent happiness.

One smile can change your day. You have to understand that happiness is more important than tensions.

“The most precious thing is a smile”

There is no precious thing in this world like happiness. Smile is the thing which you cannot buy but still it is very precious. Nobody can live well without happiness. When you smile your life becomes more wonderful. My real happiness is helping others. It always makes me happy. In the same way try to find your way for happiness do what you like the most. Spread happiness everywhere.

“Happiness is when you really need something and you get it”

We all are here only because of our dreams, our wishes. To achieve something in life. We all are working so hard to get what we want. Sometime we get frustrated or doubt ourselves.

In frustration we make mistakes but after this all process we get what we want. There is no such happiness like achievements.

“For most of us happiness is just in one thing and that is food”

Food, shelter are the basic needs of life. People are working because of food.

Sometime some people do not get good food. These people exactly know the value of food. Food is really very important without it your body is not working well. We always want to eat what we like but we must know that food is valuable. Never waste your food. So yes, our favorite food is our real happiness.

“Your smile is someone’s happiness, so keep smiling”

If you are happy, you can make other happy.
Everyone has an ability to make other happy.
Making other happy is an art. There is always someone like your family, friends who wants to see you happy always and they always pray for you.
When we get what we want not only you are happy but your surrounded people’s are also happy for you.
So always keep smiling.

“The key to being happy is when you exactly know what you are doing and after that what you get”

Happiness is something you design for the present.
Whatever you are doing make sure that you are enjoying the most. Sometimes it’s difficult to stay happy with the work we are doing. We don’t like to do but at the same time you know this is important for us or after that what we get. For that you are motivating yourself. Do whatever you like to do.

“Happiness is not just smiling and doing what you want. But it is wanting to make other smile”

The true meaning of happiness is to make other happy. There is nothing easier than helping others. When you help someone good vibes are generated and you feel good. Our inner happiness is most important. Helping someone means your soul allows you to be happy. Try to apply once this formula then see how you feel after helping others.

“Smile when others want to see you angry”

When someone behaved so rudely, they think you also behave the same but at that time use your goodness to stay calm and smile. That person will be surprised to see you happy and they get their answer in your smile. Sometime smile is better than the rude behaviors.

“Smile to make the world in the best possible way”

Happiness is not something you postpone for the future. It's something you create in your present. If you can stay positive and wear a smile in your face that means you automatically win the World. Life is all about moving in the best way. You light your path when you smile. One smile can change the world.

“The true meaning of happiness is teddy bears or your loved ones”

I have teddies so I can connect with this quote. I wrote this quote for teddies. Teddy bear is someone who cannot speak, can't see, or do anything but it can hear what you are saying. You cannot share all the things to people but you can share anything to teddies and yes your loved ones are also a reason for your happiness. Never forget these two.

“A smiling face makes you more productive”

Smiling face helps you to do your work with more energy. When you are happy, your work is going so well. The key to happiness is to be able to change pain into pleasure, darkness into light, sadness into joy, tired into energy. These all things occur only if we have the courage to change.

“Small – small happiness is the true meaning of life”

Enjoy every little things. Sometimes the smallest things give you bigger happiness. Always try to find happiness in the little things. Then you know the exact meaning of life. We all want to be happy every time but sometime it's not possible so try to find small happiness in order to overcome your problems. Whatever you are doing in the entire day find happiness in every single work.

Work

•Sometime our body want to give up but our soul will not.

The most important thing is leaders are not born but developed after grueling incessant hard working. When body wants to give up but the soul that has dream never allows to rest. When rest of the world is sleeping but someone is burning blood late night to realize dreams.

One day hard work pays off. Life is nothing without working hard.

•Everything is easy when you are busy.

Busy means not free. Hahaha! Jokes a part but when you start observing the things everything is easy nothing is impossible or you cannot do but when you are busy, you have to pay for this day and night. After so many months of struggle you will definitely get but for this time you have to stay busy then everything will be easy.

•We only see the things that we want to see, we only hear those things that we want to hear then why don't we do all those things that we wanted to do?

Like most of people everyone is doing what they don't want to do that. The only reason is money and in some cases family pressure as well. Like family want that you will become a doctor, an engineer or something like that but in this situation always remember one thing, Life is too short you never

know what tomorrow will bring. So do whatever you want to do. No work is to be considered small.

•*We all are useless without work.*

As we know life is nothing without work. When we keeps on working for long hour we get angry, feel tired, unhappy and get bored. It make us exhausted and make us don't want to eat and make us to take a little rest. Though we are not working our brain should be active. We should also stay healthy and fit.

•*Blessing is more important than the money. Money come and go but blessings always stay with us.*

Blessings is better than the money because when you are facing problems only blessings work automatically you never know. Yes, no doubt money is important but blessings is much more important.

•*Nobody can stop you without your permission.*

Where to start and where to start, journey to destination is always in your hand. If you strongly believe in your dreams, working everyday for it, consistency, determination, if your will power is much stronger than people's thinking then nobody can stop you. I believe that every day before you get up and before sleeping, keep your target in your mind active. When you put your dream in-front of your eyes. I guarantee no one can stop you from achieving your dream.

•Everybody is working very hard, so why some of them don't get what they want?

This type of question I have always in my mind. Everyone is working hard like postman, farmers and many more. I had seen always they are working really very hard rather than educated person. So why they don't get what they want? Let it be. Increase your potential level, one day this people's will also get what they actually want. May God help everyone!

•Don't hesitate to do anything, do whatever your heart permits.

Hesitation is something that stop you from doing things. This thinking will never help you. Hard work, Work smart and use all the tactics for your goal, all these effort will be wasted if you get hesitate before your work. First follow your heart. Yes, it will be very hard for you but when you try continuously one day you will sure achieve what you desired.

•If you can do what you would have never done it, then you have done rare things.

Most of time we have to do those things which we had never done before. Doing those things which we had never done before means you have to face so many obstacles because we get something or win something. Do that because we will learn and those experience will help you in the next step. If you are

doing those things means you are actually doing a rare things.

•*It is not necessary that everything will always be perfect, we need to make it perfect sometime.*

As we know life is always unfair. We experienced it. But there is always a way to do better than yesterday. We have an opportunity to do well.

Everything is not always perfect but there is an option to make it perfect. Just do what you really wanted to do and stay focused about it. If we try we can achieve everything.

•*The key to be a better worker is to work everyday.*

Your future is in your hand. You have to understand that there is so much things to distract you. So try with small steps and follow it everyday. Daily work makes you more productive. After so many days of hard work you will become the master of your destiny.

•*Keep working consistently towards your dreams.*

Only one thing we need to work on and that is consistency towards your dreams. Your dreams becomes your habit. Habit means that work you like the most and enjoying it. Don't just dream, make it happen with consistency and daily hard work. Don't try to just become a dreamer, try to become a leader in your work.

•*Never wish anything, start working for everything.*

Wish stay always wish, wish never becomes a reality but if you wish for something and immediately you start to work on your wish then one day it will become a reality, only if you really work hard for it. Reality which you will never imagine, how wonderful it looks. Everything means like how you started your work and continues till the end. Think about it , watch more videos related to your work, make a plan for it and make your wish into reality.

•*Do your work with determination, consistency and everyday.*

If you have dedication, determination, willpower you can achieve anything in life. No matter about the work whether it is small or big, difficult or easy but you have to make your work more productive. The exact definition of determination is you totally determined about your work. At a given time you just do your work nothing else.

Do the small jobs first, that small jobs give you confidence.

When you are doing those work which you had never done before but you have to start with small steps. Small things will help you. You might failed but you know you are trying with small things. If you keep trying with big steps you will lose your

confidence. With small step day by day you can build an empire.

•*How much you want to work whether little or much depends upon you, because work is a choice.*

How much you want to do but first clear your basic and after that you will get confidence on what you really wanted to do. Work is always your choice. It's totally depends upon you what you want to do. Once you decide how much you want it, it's also depends upon you. In Every work you just had to focus.

•*There are no shortcuts to your dreams.*

One way for your dream is consistency. Dream come true when you get out of your comfort zone, sacrifices, working at late nights. Those are Something you have to pay for it. You have a choice whether to choose your dream or distractions. You have to work on your dream before Dream comes true. There are no shortcuts to achieve your dreams.

•*Failure is the best way to learn your mistakes.*
“Mistakes are the portals of discovery “ As Stated by

James Joyce. We hate making mistakes. If we didn't make mistakes we would never learn anything. Failure is the best thing to learn in better way. Failure comes not to destroy you but to creates you. Make you stronger than who you was yesterday.

•*Whatever you are doing give your best.*

Doing something is easy but giving your best shot is little bit difficult. It's a way to pay for a living but that's it.

Don't let it define your Happiness. Work on what makes you happy. Don't be only busy on your work be productive also.

•*You are the master mind of your life, Give your best shot.*

The more you read, the more you think and the more you think the more you can. So anything you have to start, start with planning. Your life is in your hand how to control it. Everything depends upon you. So always try to give your best.

Journey

1.The Journey is much more beautiful than the destination.

Reaching your destination that is the moment of happiness but if you are doing what you like every moment, till the end you will be Happy. When you achieved what you want to become then see your Journey. Your Journey help you more or what you did that helps you more. There is a large difference between your Journey to destination.

2.Every person create their own journey with their dreams.

Each and every person have a different goals in their life. Everyone has a different ways to start their Journey. If we want to change our dreams into reality we should make our Journey best without knowing the Journey we cannot go ahead.

3.Have faith till you didn't achieve your goal.

As we know patience is the key element of success. Same as faith and trust is the ultimate aim to achieved what you want. If you don't have faith in what you want to achieve you will not go long. So till then have faith.

4.Your hobby will definitely help to reach your destination.

Hobby is like a habit. Hobby is what you like to do. When you love to do your work, you will enjoy your work. You will not get frustrated with that

work. Life is all about loving and enjoying yourself and work. You cannot achieve what you dream before that become your habit.

5.Try with small, end with big.

Always try with small things first. When you pick up big things you will be badly down and you will give up so easily. Big things always let you down but when you are taking small steps, you exactly know the Journey and what you want to do for big steps. When you start working with small things it will definitely ends with big things.

6.Dreaming is a reality but to run after the dream is your hard work.

Make your impossible dream come true. We all are dreaming something. All have a strong desire to complete our dreams. Infact day and night just think about it. The most important thing is we are just thinking about it. If you want to complete your dreams then you have to pay for it. If you want to change your dream into reality it is your hard work.

7.Rules are rules don't try to break them.

Rules are made but we break it easily I know that but once you understand the importance of rules you will never try to break them. Understanding of things is important. You should know the rules, why it's made up of ? What is the reason behind it? So ultimately it will help you.

8. Whatever your dream is just you have to start to make it happen.

If we are just dreaming of what we want, we will never get out of dreams. It's very important that at least you have to start. One very famous quotes related to this is "A Journey of thousand miles start with a single step."

9. Success usually comes to those who visualize their dreams.

The strongest part of our understanding is the vision. If we can visualize what we want to achieve in life something great. Once your dream is clear in your mind; you can get anything which you wish. If we cannot visualize our dreams we will never get it because when we start visualizing our dreams it take place in your mind and soul then your body automatically work for it.

10. Life is all about a Journey that has a lot of different ways.
